Dear Jason,

On behalf of World Emergency Relief and our program partners in Uganda and Liberia, I would like to thank you for the VitaPro that we shipped in March of 2004. You will be pleased to know that the product was well received and arrived in a time of dire need in both countries.

The VitaPro was distributed in the refugee camps in Lira, Uganda where it is a daily struggle to survive. There is very little food or clean water and the conditions are extreme. The VitaPro has been a great source of nutrition to all of the refugees, but especially to the children.

As you know, Liberia has been in an ongoing state of civil war for many years with the past year being an especially difficult one. Our feeding program in Monrovia faces daily food shortages. We are desperate for shelf stable foods to feed the orphans and school children that depend on us for what is usually their only meal of the day.

Thank you again for your kindness and generosity. I hope you will keep World Emergency Relief in mind should any additional product become available.

Sincerely,

Kristy Scott
V.P. Program Logistics
